ASCS Today

By TOM CONRAD

USDA requests comments on 1983 feed grain program - Secretary of Agriculture John R. Block today asked the public to comment by August 26 on provisions of the 1983 feed grain program, the details of which must be announced by November 15.

Block said he plans to announce the 1983 feed grain program well in advance of the November 15 statutory deadline.

The U.S. Department of Agriculture would like to receive as many comments as possible so it will have a broad range of public opinion about the program. He said he will study the public's recommendations, as well as the most current data on U.S. and world crop conditions and crop supply and demand before he makes final decisions.

Specifically, USDA would like to receive comments on:

- - loan and purchase prices, target prices and the national program acreage;

- - whether to establish either an acreage reduction or set-aside program, and, if USDA establishes reductions for corn, oats, barley or sorghum, the levels of such reductions;

- - provisions governing acreage devoted to conservation use;

- - whether to establish a land diversion program and if such a program is established, a payment date for the diversion;

- - offsetting and cross compliance requirements under acreage reduction program;

- - methods for determining 1983 crop acreage bases;

- - whether barley should be included for payment purposes; and

- - if malting barley is included in the 1983 program, whether it should be exempted from any acreage reduction program.

Block also asked for opinions on provisions for a farmer-owned grain reserve, commodity eligibility, premiums and discounts, the establishment of county loan rates and all other provisions necessary to carry out a loan and purchase program for feed grains.

Details of program options USDA is considering are scheduled to appear in the July 27, Federal Register.

Comments should be sent to: Howard C. Williams, director, analysis division, USDA-ASCS,room 3741-S, P.O. Box 2415, Washington, D.C. 20013. The comments will be available for public inspection in room 3741 of USDA's South Building during regular business hours.
